Mathematical Methods in the Applied Sciences

CONTENTS

VOLUME 15, Nos 1–9

Issue No. 1, January 1992

The Use of Polarization Effects in Electromagnetic Inverse Scattering Problems: D. Colton and A. Kirsch 1
On a Neutral Lotka–Volterra System: K. Gopalsamy 11
The Double-layer Potential Operator over Polyhedral Domains II: Spline Galerkin Methods: J. Elschner 23
Time Stepping Procedures for the Non-stationary Stokes Equations: W. Varnhorn 39
Scattering Theory for Hyperbolic Equations of Order $2m$: D. Pickett 47

Issue No. 2, February 1992

Exact Solutions to the Combined KdV and mKdV Equations: M. B. Mohamad 73
Vacuum Decay of Non-Abelian Vortices: Y. Yang and B. Brosowski 79
Time Delay and Finite Differences for the Non-stationary Non-linear Navier–Stokes Equations: W. Varnhorn 89
The Domain Decomposition Method for Parabolic Transmission Problems: A. Pankov and T. Pankova 109
Estimating ∇u by div u and curl u: W. von Wahl 123

Issue No. 3, March 1992

On the Moving Preisach Model: M. Brokate 145
Inversion of the Radon Transform with Incomplete Data: A. G. Ramm 159

Indexed or abstracted by Applied Mechanics Reviews, Boundary Elements Abstracts, Cambridge Scientific Abstracts, Compumath Citation Index, Current Contents, Engineering Index, Engineering Societies Library, INSPEC, Mathematical Reviews, SCISEARCH database, VINITI–USSR Academy of Science and Zentralblatt für Mathematik.

An Identification Problem for a Linear Integrodifferential Equation Occurring in Heat Flow: M. Grasselli 167

Existence of Solutions to Some Non-linear Thermoelastic Systems with Viscosity: K.-H. Hoffmann and A. Zochowski 187

Phase Transition in Binary Systems and the Binary Alloy Problem: W. Xie.... 205

Issue No. 4, May 1992

Global Solution to the Cauchy Problem in Non-linear Hyperbolic Thermoelasticity: J. Gawinecki 223

Pseudodifferential Operators with Real Analytic Symbols and Approximation Methods for Pseudodifferential Equations: Tran Duc Van and Dinh Nho Hào 239

Global Existence of Thermomechanical Processes in Non-linear Thin Rods Under Velocity Feedbacks: J. Sprekels 265

Iterative Continuous Maximum-likelihood Reconstruction Method: H. Mülthei 275

Exponential Attractors for Nonautonomous Systems: Long Term Behavior of Vibrating Beams: E. Feireisl 287

Issue No. 5, July 1992

Properties of Solutions to the Initial-boundary Value Problem for a Porous Media-type Equation: J. Goncerzewicz 299

A Symmetry Theorem for Condensers: G. Alessandrini 315

Attenuation Correction in Positron Emission Tomography: F. Natterer and H. Herzog 321

Spatially Localized Free Vibrations for a Non-linear String Model: E. Feireisl 331

A Stream-function–Vorticity Variational Formulation for the Exterior Stokes Problem in Weighted Sobolev Spaces: V. Girault, J. Giroire and A. Sequeira 345

Existence of Stationary, Collisionless Plasmas in Bounded Domains: G. Rein . 365

Issue No. 6, August 1992

Stationary Boltzmann's Equation with Maxwell's Boundary Conditions in a Bounded Domain: A. Palczewski..... 375

New Results for Guided Waves in Heterogeneous Elastic Media: P. Joly and R. Weder 395

Regularized Inner Products of Distorted Plane Waves and Near-forward Inverse Scattering: Y. V. Kurylev 411

On Missing Boundary Conditions with Unsteady Incompressible Navier–Stokes Flows: F. K. Hebeker and P. Wilde 421

An Extended Equivariant Branching Theory: E. L. Allgower, K. Böhmer and M. Zhen 433

Issue No. 7, September 1992

Wave Equations with Time-dependent Spatial Operators of Higher Order: P. Lesky, Jr. 453

On Degenerate Diffusion with Very Strong Absorption: B. Kawohl and R. Kersner 469

On a Free-boundary Problem Arising in the Study of Flame Propagation: B. A. Ton 479

A Numerical Method for Some Initial-value Problems of one Scalar Hyperbolic Conservation Law: M. Kunik 495

On the Determination of the Worst Sampling Error in a Communication System for Pulse-Amplitude-Modulated Signals I: The General Model: D. Kerber 523

Issue No. 8, October 1992

On the Fundamental Solutions of the Operators of S. Timoshenko and R. D. Mindlin: N. Ortner and P. Wagner 525

Regularization of a Non-characteristic Cauchy Problem for the Heat Equation: D. N. Hào 537

Characterization of Functions as Radiation Patterns in Linear Elasticity: A. Charalambopoulos and K. Kiriaki 547

Numerical Solution of a Time-like Cauchy Problem for the Wave Equation: M. Klibanov and Rakesh 559

A Stability Analysis for Semilinear Neumann Problems with Concave Non-linearities: C. Bandle, C. M. Brauner and C. Schmidt-Lainé 571

A Contribution to Matrix Equations Arising in System Theory: P. S. Szczepaniak 593

Issue No. 9, December 1992

Abstract Besov Space Approach to the Non-stationary Navier–Stokes Equations: T. Kobayashi and T. Muramatu 599

Inhomogeneous Timoshenko Beam Equations: A. Arosio, S. Panizzi, M. G. Paoli 621

Analysis of the Thermoelastic Model of a Plate with Non-linear Shape Memory Alloy Reinforcements: K.-H. Hoffmann and A. Zochowski 631
Multicriteria Optimization in Antenna Design: T. S. Angell and A. Kirsch 647
Dynamic MRI Reconstruction as a Moment Problem: M. Zwaan 661
Author Index 677
Volume Contents iii
